

Participant Information Sheet

Title of Study:

Cross-Cultural Attitudes to AI Resurrection Tools & Digital Legacy: An Exploratory Survey

We would like to invite you to take part in a research study. Before you decide you need to understand why the research is being done and what it would involve for you. Please take time to read the following information carefully. Ask questions if anything you read is not clear or if you would like more information. Take time to decide whether or not to take part.

WHO WE ARE AND WHAT THIS STUDY IS ABOUT

I'm Tulin Bayramoglu and I am a Master's student in Interdisciplinary Problems & Methods at the London Interdisciplinary School (LIS) researching AI ethics. This survey will, in part, inform my Capstone Dissertation project supervised by Waqas Ahmed.

A growing number of commercial AI platforms let people chat with a simulated version of someone who has died, built from that person's messages, voice recordings, or social media history. This research asks how different cultural and religious traditions shape a more comprehensive ethical picture, and what that means for practical aspects of life, like digital legacy planning in a legal will to inform further research, policy and education on this topic.

WHAT WILL TAKING PART INVOLVE?

I will ask you to take part in a survey questionnaire for a maximum of 10 minutes.

WHY HAVE YOU BEEN INVITED TO TAKE PART?

You are over 18 and eligible to take part. You are also likely to be impacted by AI, and this research aims to understand human-AI relationship better.

EXPENSES AND PAYMENTS

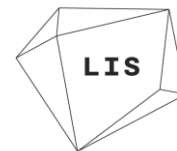

N/A

DO YOU HAVE TO TAKE PART?

Participation is completely voluntary, and you have the right to refuse participation, refuse any question or withdraw at any time without any consequence whatsoever.

WHAT ARE THE POSSIBLE RISKS AND BENEFITS OF TAKING PART?

It is possible that the survey may touch on sensitive topics for you, although student researchers have been advised against this. If you feel that your mental wellbeing has been affected by any issue that has come up in this study, please contact the Head of Student Support

(student.support@lis.ac.uk) if you are a current LIS student. Otherwise, you are recommended to contact The Samaritans on 116 123 for a free call with a trained volunteer, or text SHOUT to 85258 for text-based support. You may also contact Cruse Bereavement Support in the UK offers free support on 0808 808 1677.

We do not foresee any direct benefits for you as an individual.

WILL TAKING PART BE CONFIDENTIAL?

Your input will be anonymised in any publication or presentation that may arise from this research. However, non-anonymised data in the form of signed consent forms will be retained as part of the research process. You will be assigned a numerical identifier (participant number) which will be used to reference all of the data collected from you. A document which will hold both your real name, and your participant number will be stored securely according to LIS guidelines, and will not be shared other than if required with supervisor of this research.

Researchers may be required to break confidentiality if they strongly believe that there is a serious risk of harm or danger to you, or another person may be at risk of harm.

We recommend that you **do not** share highly sensitive information (e.g., physical, emotional or sexual abuse, child protection concerns, rape, self-harm, suicidal intent or criminal activity) during these brief interactions. If you have any concerns of this nature, please contact the Designated Safeguarding Lead in your organisation (current LIS students should use the Student Support email).

HOW WILL INFORMATION YOU PROVIDE BE RECORDED, STORED AND PROTECTED?

Signed consent forms or printed documents containing interview or focus group data will be stored securely according to LIS guidelines (e.g. in a locked filing cabinet on university campus or, if electronic, these will be retained in or as password-protected files), until all participating student researchers have completed their degree.

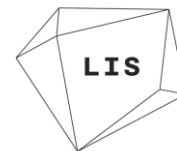

Under freedom of information legislation, you are entitled to access the information you have provided at any time.

WHAT WILL HAPPEN TO THE RESULTS OF THE STUDY?

The overall findings from our analysis may be used in assessments, included in a publication (such as a journal article or blog post), shared in a conference presentation, or used for teaching purposes in the future. No information that could identify any individual will be included in these findings, unless you have asked to be named.

WHO HAS REVIEWED THE STUDY?

Research for this study has undergone checks for ethical research, and where required been reviewed by ethical review board in accordance with the LIS Research Ethics Policy.

WHO SHOULD YOU CONTACT FOR FURTHER INFORMATION?

The faculty members overseeing this small student-led project are below. If you wish to report a concern about how this study has been conducted, please contact the named individuals below.

Student researcher: tulin.bayramoglu@klis.ac.uk

Supervisor: wagas.ahmed@lis.ac.uk

Module lead: maria.madero@lis.ac.uk

Module Deputy lead: james.carney@lis.ac.uk
