

Accessibility Statement

Accessibility

This site aims to be usable by people of all ages, technical backgrounds, and abilities. Available features include: adjustable text size (A / A+ / A++), a high-contrast mode, a reduce-motion toggle that also respects your device's own reduced-motion setting automatically, a dyslexia-friendly font toggle (Atkinson Hyperlegible), keyboard-operable navigation and forms, visible focus outlines, and a skip-to-content link on every page.

Most of this site uses ordinary links and forms rather than pop-ups, so moving between pages and completing the Will & Legacy tool works the same way as any standard website, with the browser's own Back button always available. One exception is used deliberately: a single, dismissible support notice appears once per browser session, reminding you that bereavement support is available if this topic is difficult right now. It is built as a proper accessible dialog rather than a browser alert, can be closed immediately with a click, a tap, or the Escape key, keeps keyboard focus trapped sensibly inside it while open, and never reappears again that session once dismissed.

A language selector is included as a working prototype. Selecting a language other than English currently shows a short, honest, non-blocking notice next to the selector rather than translated content. Full translation is planned but not yet built.

Found something that does not work well with your screen reader, switch device, or browser? Please describe it on the [Contact Us](#) page, real reports directly improve this tool.

Digital Legacy Hub

A free, standalone educational tool about digital accounts, digital property, and AI simulation of people after death, and what world traditions and the law currently say about it. Not a law firm, therapy service, or product endorsement.

About this tool. This site is an accompanying artefact for a Master's capstone project submitted at the London Interdisciplinary School, researching cross-cultural ethics of AI-powered digital resurrection tools and digital legacy planning. It is an educational awareness tool first and foremost, built to help you think and talk with people you trust. **It is not a substitute for legal advice.** For a legally valid will, speak with a qualified solicitor. See the [About page](#) for the full project description.
